

# Magento 2

---

Openbucks payment module for magento 2.X

Securely accept cash and gift card payments in the U.S. with the Openbucks payment gateway plugin. Openbucks has partnered with major retailers in the U.S. such as CVS/Pharmacy and Dollar General to make both gift card and cash payments available for online goods and services.

## How to get started

---

1. Install the plugin
2. Contact sales@openbucks.com to setup your account and obtain keys to activate the plugin

## Manual install

---

1. Download the Payment Module archive, unpack it and upload its contents to a new folder /app/code/Openbucks/Openbucks/ of your Magento 2 installation
2. Enable Payment Module

```
$ php bin/magento module:enable Openbucks_Openbucks --clear-static-content  
$ php bin/magento setup:upgrade
```

3. Deploy Magento Static Content (Execute If needed)

```
$ php bin/magento setup:static-content:deploy
```

## Installation via Composer

---

1. Go to Magento2 root folder
2. Enter following commands to install module:

```
composer config repositories.openbucks git https://github.com/openbucks/magento.git  
composer require openbucks/magento2:dev-master
```

Wait while dependencies are updated.

3. Enter following commands to enable module:

```
php bin/magento module:enable Openbucks_Openbucks --clear-static-content  
php bin/magento setup:upgrade
```

4. Enable and configure Openbucks in Magento Admin under Stores/Configuration/Payment Methods/Openbucks

Note: If it needed `bash php bin/magento setup:static-content:deploy`

## Installation via Magento Marketplace

---

<https://marketplace.magento.com/openbucks.html>

## Plugin Configuration

---

Enable and configure Openbucks plugin in Magento Admin under Stores / Configuration / Sales / Payment Methods / Openbucks .

## Updates

---
